

What Happened?

Before Reading	During Reading	After Reading
<p>Q1: Let's look at the cover and read the title. In the story, something happened to the water. What do you think happened?</p> <p>A1: Possible answers: I think the water turned to ice. I think the water dried up. I think the water evaporated.</p> <p>Q2: In the picture, where do you see water?</p> <p>A2: There is water in the lake. There is water in the lemonade.</p>	<p>Q1: What happened to the water in the winter?</p> <p>A1: The water froze. It became a solid. It turned to ice.</p> <p>Q2: What happened to the water on the hot days of summer? Then what happened?</p> <p>A2: The water evaporated. It became a gas (water vapor). Then water returned to the lake when it rained.</p>	<p>Q1: Water vapor condensed on the inside of the window. Then the boy drew pictures. What happens when water vapor condenses?</p> <p>A1: When water vapor in the air cools, the water vapor molecules group together, or condense, into water droplets.</p> <p>Q2: As we learned by reading the story, water can be found in three states. What are they?</p> <p>A2: Water can be a liquid, a solid (ice), and a gas (water vapor).</p>

What Happened?

What happened to the water?

It froze.
