Crime Fighters	14
Green Energy	16
The Internet	18
High-speed Trains	20
Outer Space	22
Sum It Up	24

# What Is Technology?

Technology is using science to help make new things. It changes the way we live, the way we work, the way we travel, and the way we talk to each other.

Technology helps us to make robots, machines, and engines. What is this robot doing?

Information and communication technology (ICT) helps us find new ways for people to talk to each other and communicate. Name 3 ways that you communicate with friends.

- count
- list
- how many?

Space technology helps us explore outer space. How many more numbers will appear on the screen before the shuttle “blasts off”?

“High tech” means using up-to-date technology. List some high-tech things you use. Count them.

Keep reading to discover how “being high tech” is part of the future.
