## Preparing the Trick

You will need:

a jar

scissors

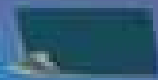

tape

candy

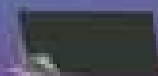

three sheets of card:

dark

bright

black

1. Fill your jar with candy.

You could use marbles instead of candy.

## 2. Make three tubes.

- First, make the secret tube. Use the black card. Make the tube a little bigger than the jar.
- Next, make the bright tube. Use the brightly colored card. Make this tube bigger than the secret one.
- Then, make the big tube. Use the dark card. Make this the biggest tube.

All the tubes need to be the right size to slide in and out of each other easily.

## 3. Cut little holes in the big tube.

When the big tube is over the bright tube, you can see the bright tube inside.
